Skills & Programming Language Proficiencies

Competent in: • Rust • Azure DevOps • Git • Linux Environments • Technical Documentation Writing

Currently learning: • Bash Scripting • SQL • Scheme • Nix • More Rust

Notable Projects

- **Automated Testing Framework**

Design and implementation of the tools and systems needed for users of a website-creation platform to robustly test their creations.

- **Automated Pipeline Workflow Infrastructure**

Implementation of a set of systems that allow for users to independently request and track various Azure DevOps pipeline deployments.

- **Various Toy Networking Fundamentals Projects**

Including a recursive DNS resolver, a reimplement of Ping and a minimal working version of the TCP Connection, Transfer, and Termination processes.

Experience

Developer - Automation Engineer

CoreStream GRC, 2024

Configuration Analyst

CoreStream GRC, 2023

Certifications

Microsoft Certified: Azure Fundamentals

Microsoft, 2025

Education

M.A (First), Philosophy

King's College London, 2022

B.Sc (First), Computer Science with Intelligent Systems

King's College London, 2020

Awards

Special Recognition Award

CoreStream GRC, 2024

Associateship of King's College, Award in Ethics & Theology

King's College London, 2022

O'Reilly Partnered Award for 'Most Insightful Statistics'

King's College London, 2018

Teaching Experience

Teaching Assistant for 'Computer Systems'

King's College London, Winter 2019
